

Quality Policy – AS 9100 D

At Duncan Engineering Limited, we are committed to being a trusted partner in the aerospace, defence, and industrial sectors by delivering precision-engineered products and solutions that consistently meet or exceed customer expectations and industry standards.

We shall achieve this by:

- ❖ Ensuring conformity to AS9100D, statutory, regulatory, and customer requirements at all stages of our operations.
- ❖ Maintaining a culture of zero defect, on-time delivery, safety, and reliability.
- ❖ Embedding risk-based thinking and process approach in all business functions to enhance product quality and customer confidence.
- ❖ Continuously improving our Quality Management System, processes, and technologies to deliver competitive, innovative, and sustainable solutions.
- ❖ Empowering our people through training, teamwork, and accountability, ensuring a culture of quality at every level.
- ❖ Fostering meaningful partnerships with all stakeholders including customers, suppliers, and employees, to drive mutual growth and long-term success.

This policy provides the framework for establishing and reviewing our quality objectives and shall be **communicated and implemented across all levels of the organization**. We are dedicated to maintaining the effectiveness of our Quality Management System and continually improving its performance.
